## AT-003 Tax Performance Engineering (NEW)

*Presented by Platinum Sponsor: BDO*

Meet BDO's Tax Performance Engineering team and discover what they can do for you. Our focus is tax process improvement: assisting tax departments with the development of a risk-based approach to global income tax reporting through process engineering and the maximizing the efficiency of these processes using technology. These improvements increase performance and reduce risk and also allows for more time to be devoted to analytics and review, versus data manipulation and maintenance of spreadsheets. More standardization, less risk.

Our projects involve a review of all aspects of the tax function: Process, Data, Software & Workforce. Our tax technical knowledge and broad experience solving tax process challenges, coupled with his knowledge of the various technologies, has led to highly successful results. We have experience with all major tax technology vendor.

With a network spanning more than 150 countries worldwide, BDO is the 5th largest global network of public accounting firms. Our seamless global approach allows us to serve clients through a central point of contact, granting access to relevant experience across borders.

### Objectives:

- Understand a risk-based approach to global income tax reporting
- Evaluate your current tax processes with the goals of:
  - Identifying opportunities within your organization to maximize efficiency through the use of technology
  - Reducing the amount of time spent manipulating data and maintaining spreadsheets
  - Devoting more time to data analytics and review
- Differentiate between types of tax technology solutions
- Apply tax technology solutions to increase standardization and reduce risk

## SS-020 Achieving Financial Controls in Fixed Asset Management (NEW)

*Presented by Platinum Sponsor: Bloomberg Tax & Accounting*

Fixed Assets often represent the single largest balance sheet item on company's financial statements, and the sheer volume of data involved in managing them creates massive risk. However, with the right practices and procedures in place, fixed assets can represent one of the best tax optimization opportunities around. Through planning for cost segregation studies, optimizing the use of bonus depreciation, and differences in state tax depreciation rules, tax professionals can turn fixed assets from a tracking nightmare into a prime planning opportunity. Join Sr. Product Manager Ryan Sheehan of Bloomberg Tax & Accounting to learn how.

### Objectives:

- Best practices for maintaining control over fixed assets
- How to manage the risk-benefit of cost-segregation studies
- How to creatively tackle the challenges of state tax depreciation calculations
- How to cope with tax law changes

## SS-021 Tax Process Improvement at Toyota (NEW)

*Presented by Platinum Sponsor: KPMG, LLP*

The TFS team was working 20 hour days over a 9 day close, with their processes being time consuming and redundant. The source workpapers were not standardized, automated, or integrated with their systems. Learn how Toyota Financial Services improved their state process through automation, standardization, workpaper and security improvements.

### Objectives:

- Reduce time spent on calculations by identifying and reducing redundant process steps
- Standardize, automate, integrate and secure source workpapers
- Standardize the use and calculation of state data
- Deployed an NOL tracking tool to secure historical data and automatically analyze available NOL's

## SS-022 Expanding the Power of Corptax Data (NEW)

*Presented by Platinum Sponsor: KPMG, LLP*

Corptax is, at its heart, a database. However, there are a multitude of tables within Corptax that contain provision and/or compliance data that can be used to empower dashboards, visualizations, models, etc. Which ones to use for which purpose can be overwhelming and confusing. Come listen to an interactive discussion with Morgan Stanley and KPMG on how to identify and choose from the inventory of available data sources within Corptax, and commonly available enabling technologies that can be used and are easily refreshable to incorporate last minute changes. Examples presented will include an analysis of state provision components, as well as a rate rec that allows for flexible views.

### Objectives:

- Recognize the data source options within Corptax
- Identify ways the Corptax data can make your reporting and analysis more powerful

## DRA-003 The Power of Planning with Advantage State Tax Analyzer & Corporate Tax Analyzer (NEW)

*Presented by Platinum Sponsor: Bloomberg Tax & Accounting*

Tax planning is too often considered a nice-to-have for most tax professionals. Planning is typically done in ad-hoc spreadsheets. M&A activity is modeled after the fact. With the sheer amount of data needed for effective planning, most tax departments don't have the time or resources and need to hire expensive third-parties. However, in the tax department of the future, pro-active tax planning can be done quickly and effectively using tools designed with enough tax law for accuracy, but not so much that calculations are not flexible. Learn how effective planning can be done with Advantage State Tax Analyzer and Corporate Tax Analyzer from Bloomberg Tax & Accounting.

### Objectives:

- Why planning in spreadsheets is painful
- How Advantage State Tax Analyzer and Corporate Tax Analyzer can assist
- Real life use cases where effective planning saved the day

## PR-005 Optimizing Provision: Typical Challenges & Solutions (NEW)

*Presented by Platinum Sponsor: BDO*

BDO's Tax Performance Engineering team works with companies to design optimized processes, organize and format their source data and tax calculations, document processes, and enhance the use of technology, with the goal of streamlining tax reporting processes. In this session, we will identify and discuss common tax provision process challenges and review Corptax Provision configuration options that can reduce the time spent resolving these issues.

Through our experience with a broad range of client challenges, we've discovered that performance can be optimized by:

1. Taking a step back and looking at your complete life-cycle of income tax data
2. Designing processes that fit your company's tax deliverables and data format
3. Choosing the right configuration options within Corptax Provision
4. Complementing Corptax Provision using Corptax add-on tools such as Corptax Office, Corptax BOTS and others
5. Utilizing complimentary tools from Alteryx and Microsoft to enhance functionality and ease of use

### Objectives:

- Identify your organization's specific challenges related to your provision process
- Evaluate available tools within your organization
- Recognize the areas of the provision process that would benefit from the application of special processing or tools

## SC-003 to SC-008 Meet with Corptax! (NEW)

Book your focused time with us to discuss the topic of the hour. We will have resources to go over questions that you have, provide tips, tricks, and tools of the trade for the topic. Bring your questions and scenarios and run through with us what you are trying to achieve. We will structure the time to go through the topic, provide feedback on your questions, and also spend some time discussing making processes around these topics more efficient and effective.

### Objectives:

- Share your processes and questions around specific product topics and functional areas
- Discuss methods for process improvement
- Engage in the opportunity to also discuss the processes used by your peers
